	Judy Nguyen	2861	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7 and 8 is/are rejected.
- 7) ☒ Claim(s) 6, 9-14 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

Claims 1, 7, 8, 10 and 12 are objected to because of the following informalities:

- Claim 1, lines 6, 8, 9, 13: “, or each” should be deleted. There is only one.
- Claim 1, lines 10-11, 17: “, or each,” should be deleted.
- Claim 7, line 1: “or each” should be deleted.
- Claim 7, line 4: “, or each” should be deleted.
- Claim 8, line 2: “, or each” should be deleted.
- Claim 10, line 1: “, or each,” should be deleted.
- Claim 10, lines 5, 5-6: “, or each” should be deleted.
- Claim 12, lines 1, 3: “, or each” should be deleted.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2861

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 5, 7, 8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,655,786.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims the features recited in the claims of the present application as follows:

- An elongate receiving member that defines a receptacle [column 8, lines 15-17].
- At least one elongate printhead module [column 8, line 18], the printhead module defining a channel in which a printhead chip is receivable [column 8, lines 28-29].
- The receiving member and the printhead module together defining pairs of complementary location formations such that the printhead module is received in the receptacle so that the complementary locating formations engage each other [column 8, lines 32-34], with the module extending along a longitudinal axis of the receiving member [column 8, lines 22-23].
- The complementary location formations comprise a first pair of complementary location formations [column 8, lines 32-35].
- The first pair comprising a projection [corresponding to claimed engaging member which must be in a form of projection to allow it to be engaged with the claimed corresponding recess] and a recess [column 8, line 43] adapted to receive the projection.

Art Unit: 2861

- The recess is extended in the longitudinal direction with respect to the projection, the projection is slidably received within the recess so that expansion of the printhead module relative to the receiving member along the longitudinal axis is accommodated [column 8, lines 42-50].
- The receiving member has opposed walls interconnected by a bridging portion to define the receptacle [column 8, lines 15-17].
- A plurality of printhead modules arranged in end-to-end relationship in the receptacle [column 8, lines 18-19], each channel being angled with respect to its associated module so that the printhead chips of adjacent modules overlap [column 8, lines 27-31].
- Each printhead module has a set of locating formations and in which the receiving member has a complementary set of locating formations at a location for each module in the receptacle [column 8, lines 32-35].
- The complementary location formations further comprises a second pair of complementary location formations comprising a projection and a correspondingly sized recess for receiving the projection to locate the printhead module in a longitudinal direction within the receiving member [column 8, lines 42-50].
- The recesses of the first and second pair of complementary location formations are formed in a first wall of the printhead module, and the projections of the first and second pair of complementary location formations are formed in a first wall of the receiving member [column 8, lines 42-50].

Claim 4 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,655,786 in view of Cowger et al (US 5,565,900).

The patent claims all claimed features of the present application except for each module being stepped at its end to nest with a consecutive module.

However, Cowger et al teaches a plurality of modules each being stepped at its end to nest with a consecutive module [see Figures 1, 2].

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make each claimed module in the patent to be stepped at its end to nest with a consecutive module as taught by Cowger et al for the purpose of preventing gaps between the nozzles of the modules.

Allowable Subject Matter

Claims 6, 9, 11, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2861

Claims 10 and 12 would be allowable if rewritten to overcome the objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive.

Applicant basically argues that "the, or each printhead module" is provided to cover the situations where one, or more than one printhead module is received. However, the claims require only one printhead module. Although the recitation of "at least one" suggests that it could have more than one, the fact remains that there only one module recited so far. If applicant intended for the claims to include a plurality of modules, then this feature should be recited in the claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2861

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judy Nguyen whose telephone number is (571) 272-2258. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
